

# MA in Logistics

In partnership with:

UNIVERSITÀ TELEMATICA  
INTERNAZIONALE UNINETTUNO

## MA in Logistics

The aim of the MA Logistics course is to train professionals who possess managerial skills to support project management in different sectors. More specifically, this master's course focuses on training professionals, such as Logistics and Supply Chain Managers, for companies and agencies globally.

This BSBI programme can be taught in either Berlin or Barcelona, or you could start in Barcelona and finish in Berlin. The programme is accredited by UNINETTUNO. BSBI is partnered with CETT Barcelona School of Tourism, Hospitality and Gastronomy. This MA programme can be taught at CETT's campus in Barcelona or at BSBI's campus in Berlin.

For more information about the Italian Higher Education System, please visit: [cimea.it/en/](http://cimea.it/en/)

\*With the option to move to Berlin after 12 months. Students who take the Spanish route have the option to complete their studies in Barcelona or Berlin. If the student chooses to finish their studies in Berlin, they will need to pass an English test.

"I chose BSBI because the programme contains all the topics that I want to learn to take my professional career to the next level."

**Eduardo Monsalve Abarca**, BSBI student

This programme consists of three terms (10 weeks each) and a term focused on your dissertation (12 weeks). Teaching takes place Monday to Saturday, during morning, afternoon, or evening sessions.

The modules of this programme are offered and delivered 100% on campus. Students will also have additional access to course and reading materials via the UNINETTUNO platform.

You will also attend modules on study and academic research methods and study the German language alongside your master's degree subjects. During your final term, you will research and prepare a dissertation on a topic of your choice.

## Modules

- Study Methods
- Operational Research
- Project Management
- Quality Management
  
- Logistics and Project Support
- Business Organisation
- Economics and Business Management
- Marketing
  
- Economics of Innovation
- Numerical Methods
- Research Methodology
- Final Dissertation

## Upon successful completion of the programme, students will be able to:

- Present and communicate professional issues relevant to SCM and logistics.
  
- Determine the value and financial impact of supply chain decisions and designs on the profitability, efficiency, and stakeholder satisfaction of your entire organization.
  
- Develop and apply ongoing strategies for personal, career and professional development.

## What will you experience?

Among expected results, there is the acquisition of economic-managerial tools and skills aimed at cooperation during the logistics project and its execution phases. The role of the Logistics Executive focuses on developing the skills needed to check the progress of building supply chains and detect any problems to be dealt with, as it regards both project progress and the quality of production as well as organisation.

## Why study this course?

The master's course envisages the training of professional profiles such as Logistics and Supply Chain Managers and Executives for companies and agencies working globally higher education institution to another.

### **European Credit Transfer and Accumulation System (ECTS)**

You will earn a master's degree with 90 ECTS. This helps student mobility in the EU when it comes to transferring credits from one higher education institution to another.

## Who should take this course?

This master's course is for students who have earned a three-year university degree in a course in the Engineering Faculty or in the field of Economic Sciences or Statistical Sciences.

## Career Progression

After completing this MA in Logistics, you will be able to pursue a career within global companies which need your skills for maintaining, improving and expanding their operational networks for selling their goods and services
